

Achieve Productive Teamwork

 **MaitreView**TM

Multi-window Video Processor

AVLINK[®]
The Highest Quality AV Solutions

One Product, Multiple Views

MaitreView™ is the seamless-switching and uncompressed 4K/60Hz multi-window video processor for multiple inputs and outputs for changing the way we communicate.

Flexible Views

Classic Views

The multi-window performance provides presenters the ability to share effectively – accomplishing digital transformation in mission-critical applications, including corporate, healthcare, education, government and much more.

Ease of Use, Tablet Control

Manage various sources with diversified layouts and support presenters with a simple tablet device control.

Inspire the interactive discussions and share data efficiently than ever before.

MaitreView™ opens numerous possibilities to versatile applications from regular trainings to conference meetings.

Stunning Resolution Clear Vision

Seamless Switching
between Multiple Sources

High-resolution
Lossless Video

Independent Layouts
Processing on 2 Outputs

Intuitive Management, Flexible Control

On-Screen Display to
Identify Input Sources

Flexible Control

- Windows Software
- Tablet APP
- Front Buttons
- APIs (Application Programming Interfaces)

Modularized Border Lines to
Highlight the Selected Regions

Display all information in high resolution for easy comparison and assist checking details to create a productive and effective meeting.

Meeting Room Applications

Both employees and customers have the flexibility to share in any way they want and contribute to all kinds of meetings in conference rooms, huddle rooms, and working spaces.

Operating Room Applications

The multi-view and zero-latency display makes the most of the surgical visual space to enhance workflow in operating rooms (ORs) and intensive care unit (ICUs).

Crystal-clear ultrasound, x-rays, and scans satisfy the needs of surgeons and clinical staff through all phases of a surgery.

Classroom Applications

Teachers and instructors engage audiences with many sources but sustain ease of use. Students are able to compare facts and showcase video content when present.

Offer superior performance and contribute to schools when helping immersive learning - creating smarter classrooms to show live streams, A/V files, still images, documents, and websites.

Situation Room Applications

**MADE IN TAIWAN
AND
QUALITY GUARANTEED**

Help make fast decisions by displaying uncompressed video on all monitors in different views.

Never miss any detail! The zero-latency switching shows real-time video between multiple sources for surveillance and security.

Testimony

With the MaitreView™ 4KPro, we can have 5 videos and files including CAD, sketch, and photos displayed simultaneously. We can also jump back and forth and put layers on top. The system helps save 50% of the time compared with before.
